Channel Configuration

The DSL WAN connection can be separated virtually into multiple channels by assigning different VPI/VCI in each Permanent Virtual Circuit (PVC). In each PVC you can also set the connection protocol to be PPP, Dynamic IP, Static IP or Bridge mode.

Note : The "Connect" and "Disconnect" button will be enable only when the connect type of PPPoE and PPPoA is "Manual"

Default Route Selection: Auto Specified

VPI: VCI: Encapsulation: LLC VC-Mux
